

Hello! My name is Zeynep and I'm from Turkey.

This was really exciting experience to live in a foreign country for me. Because it was the first time I was in abroad. At the beginning I thought that how could I speak English every moment but I overcame my fear and right now I speak also German too, not great but ok! I still learn German, language learning always keep going. ESC is unmissable opportunity if you interested in getting to know different cultures.

I was a volunteer in Verein Kinderinitiative, place where children come there after school. My task was to prepare food for the children, helping to do their homework and playing game with them. Actually those were not a big task for me contrary to because I had really good colleagues that were Karin and Thomas. Working with them means to have fun and learning from each other. I will never forget them. The other hand, working with children and communicating with them was teaching a lot of thing to me. They were always know what they want to do and find to have fun a thing. But same time this responsible necessary being careful and patient. I have accumulated unforgettable time at work.

Vienna is fascinating place with nature. Every morning to wander with bike at the Danube side and then go to Prater Wald were my lovely routine. While you taking bike on the Danube bike road, you can suddenly find secret and breathtaking place for swimming or just chilling. Sometimes early mornings I went to swum Alte Donau before I went to the work and afterwards I felt that I was ready to go work! 😊

Now, I have many friends from all over the world and maybe we will see each other again later, I'm pleasant thats why. And the last one, I grateful to Grenzenlos for organizing different activities to volunteers in free time.

Ich habe ein Geschenk von mir zu Hort gemacht.

Das war ein mask von toilet paperroll. Wir haben mit Kinder gemacht.
