

Project Report

My journey in Vienna start on September 2020, the project was working in a kindergruppe this experience was some new for me especially I'm a midwife mean I don't have much experience about working with kids except on the social work.

This experience let me discovering a new side of my skills and also my personality, I discovered the creative side of me I had made many creative activities with the kids and I was good on that, for my personality changed because I was living with people with another culture, prinicps and convictions.

The project was a kindergruppe organized by the parents and the tasks that I had were taking care of kids, preparing the food and doing activities with the kids.

This project gives me a chance to discover this beautiful country where there's a lot of nice places that I enjoyed visited it and also I have many information about the work with kids.

You will found in this report some pictures of the project. My year in Vienna ended on July 2021 this year will stay graved in my memory .

**Thank you for
everything!**

Winter in
Vienna

Karnaval Day

Osterfest gifts

Osterhase
hahahaha
