

My project this year has been in a "Hort" with children between 6 and 10 years old, and it has totally exceeded my expectations, as I have not only loved the work I have been doing, but also my colleagues have done everything possible to make me feel comfortable and supported. My tasks have been to supervise the children, play with them, carry out tasks such as handicrafts and different workshops, help them with their homework and solve all the problems and difficulties they may have had. For me this year there have been many special moments, for example, the simple fact that a child looks for you especially to play or do something specific, for me says a lot about how they perceive me and my work. I have learned a lot about pedagogy, but also about a culture different from mine and another language.

My tips are:

1. Use the website Grenzenlos to see all the activities they do in Vienna.
2. Use bumble to make new local friends and make fun and different plans.
3. Shop at local markets, not supermarkets, as it will be much cheaper
